Chronological Index

A10-001 Compressibility Considerations for *k-w* Turbulence Models in Hypersonic Boundary-Layer Applications. Christopher L. Rumsey and Roger Kimmel, *NASA Langley Research Center* (**47**, 1, p. 11) Article

A10-002 High-Temperature Spectrometer for Thermal Protection System Radiation Measurements. Susan M. White, *NASA Ames Research Center* (**47**, 1, p. 21) Article based on AIAA Paper 2008-1255

A10-003 Modeling of Electromagnetic Manipulation of Plasmas for Communication During Reentry Flight. Minkwan Kim and Iain D. Boyd, *University of Michigan*; and Michael Keidar, *George Washington University* (**47**, 1, p. 29) Article

A10-004 Transonic Aerodynamics of a Lifting Orion Crew Capsule from Ballistic Range Data. Jeffrey D. Brown and David W. Bogdanoff, *ELORET Corporation*; Leslie A. Yates, *Aerospace Computing, Inc.*; and Gary T. Chapman, *ELORET Corporation* (**47**, 1, p. 36) Article based on AIAA Paper 2008-1232

A10-005 X-43A Flush Airdata Sensing System Flight-Test Results. Ethan Baumann, Joseph W. Pahle, and Mark C. Davis, *NASA Dryden Flight Research Center*; and John T. White, *Tybrin Corporation* (**47**, 1, p. 48) Article based on AIAA Paper 2008-6570

A10-006 Drag Reduction Using Aerodisks for Hypersonic Hemispherical Bodies. Mahmoud Ahmed and Ning Qin, *University of Sheffield*, Great Britain (**47**, 1, p. 62) Article

A10-007 Aerodynamic Analysis of a Spinning Missile Using a High-Order Unstructured-Grid Scheme. Chunhua Sheng, Xiao Wang, and Qiuying Zhao, *Mississippi State University* (**47**, 1, p. 81) Article based on AIAA Paper 2009-1090

A10-008 Canard–Elevon Interactions on a Hypersonic Vehicle. Torstens Skujins and Carlos E. Cesnik, *University of Michigan*; Michael W. Oppenheimer and David B. Doman, *U.S. Air Force Research Laboratory* (**47**, 1, p. 90) Article based on AIAA Paper 2008-6383

A10-009 Improvements to Power-On Base Pressure Prediction for the Aeroprediction Code. Frank G. Moore and Linda Y. Moore, *Aeroprediction, Inc.* (**47**, 1, p. 101) Article

A10-010 Fully Structured Aerodynamic Model for Parameter Identification of a Reentry Experimental Vehicle. Nicola de Divitiis, *University of Rome "La Sapienza,"* Italy; and Antonio Vitale, *Italian Aerospace Research Centre*, Italy (**47**, 1, p. 113) Article

A10-011 Description and Flow Assessment of the Delft Hypersonic Ludwieg Tube. Ferry F. Schrijer and Willem J. Bannink, *Delft University of Technology*, The Netherlands (**47**, 1, p. 125) Article based on AIAA Paper 2008-3943

A10-012 Spacecraft Coating-Induced Charging: Materials and Modeling Study of Environmental Extremes. Michelle M. Donegan and Jennifer L. Sample, *Johns Hopkins University Applied Physics Laboratory*; J. R. Dennison and Ryan Hoffmann, *Utah State University* (**47**, 1, p. 134) Article

A10-013 Effect of Simulated Lunar Dust on the Properties of Thermal Control Surfaces. James R. Gaier and John Siamidis, *NASA John H. Glenn Research Center at Lewis Field*; and Elizabeth M. Larkin, *Case Western Reserve University* (**47**, 1, p. 147) Article

A10-014 First Korea Space Launch Vehicle Kick Motor Movable Nozzle Motion. Jae-Seok Yoo, *Korea Aerospace Research Institute*, South Korea (ROK) (**47**, 1, p. 153) Article

A10-015 Analysis of Single-Event Upset Rates on the Clementine and Cassini Solid State Recorders. Henry B. Garrett, Insoo Jun, Allan Johnston, and Larry Edmonds, *Jet Propulsion Laboratory, California Institute of Technology*; and Robin W. Evans, *Gibbel Corporation* (**47**, 1, p. 169) Article based on AIAA Paper 2009-118

A10-016 Satellite Orbit Design and Maintenance for Terrestrial Coverage. Prasenjit Sengupta, *Optimal Synthesis Inc.*; Srinivas R. Vadali and Kyle T. Alfriend, *Texas A&M University* (**47**, 1, p. 177) Article

A10-017 Guidance, Navigation, and Control System Performance Trades for Mars Pinpoint Landing. Bradley A. Steinfeldt, Michael J. Grant, Daniel A. Matz, and Robert D. Braun, *Georgia Institute of Technology*; and Gregg H. Barton, *Charles Stark Draper Laboratory, Inc.* (**47**, 1, p. 188) Article based on AIAA Paper 2008-6216

A10-018 High-Speed Solution of Spacecraft Trajectory Problems Using Taylor Series Integration. James R. Scott, *NASA John H. Glenn Research Center at Lewis Field*; and Michael C. Martini, *Analex Corporation* (**47**, 1, p. 199) Technical Note based on AIAA Paper 2008-6957

A10-019 Initial Orbit Design from Ground Track Points. Ossama Abdelkhalik, *Michigan Technological University* (**47**, 1, p. 202) Technical Note

A10-020 Tether Capture and Momentum Exchange from Hyperbolic Orbits. Paul Williams, *Delft University of Technology*, The Netherlands (**47**, 1, p. 205) Technical Note

A10-021 Wrinkling Analysis Method Based on Singular Displacement Component Modification for Membrane Structure. Changguo Wang, Huifeng Tan, and Xingwen Du, *Harbin Institute of Technology*, China (PRC) (**47**, 1, p. 210) Technical Note based on AIAA Paper 2007-1822

A10-022 Gravity-Induced Wrinkling in Subscale, Singly Curved Parabolic Gossamer Membrane. Jack Leifer, *Trinity University*; David C. Jones and Adam M. Cook, *University of Kentucky* (**47**, 1, p. 214) Technical Note based on AIAA Paper 2007-1833

A10-023 Drag Reduction for Spike Attached to Blunt-Nosed Body at Mach 6. R Kalimuthu, *Vikram Sharabhai Space Center*, India; Rakhab C. Mehta, *Nanyang Technological University*, India; and E. Rathakrishnan, *Indian Institute of Technology*, India (**47**, 1, p. 219) Technical Note

A10-024 Single-Stage-to-Orbit Versus Two-Stage-to-Orbit Air-breathing Systems. William H. Heiser, *U.S. Air Force Academy* (**47**, 1, p. 222) Technical Note

A10-025 Hypersonic Boundary-Layer Transition with Ablation and Blowing. Steven P. Schneider, *Purdue University* (**47**, 2, p. 225) Survey Paper based on AIAA Paper 2008-3730

A10-026 Overview of Advanced Concepts for Space Access. Andrew D. Ketsdever, Marcus P. Young, and Jason B. Mossman, *U.S. Air Force Research Laboratory*; and Anthony P. Pancotti, *ERC, Inc.* (**47**, 2, p. 238) Survey Paper based on AIAA Paper 2008-5121

A10-027 Implementation of Radiation, Ablation, and Free Energy Minimization in Hypersonic Simulations. Peter A. Gnoffo, Christopher O. Johnston, and Richard A. Thompson, *NASA Langley Research Center* (**47**, 2, p. 251) Article based on AIAA Paper 2009-1399

A10-028 Computational Flowfield Analysis over a Blunt-Body Reentry Vehicle. Antonio Viviani, *Seconda Università di Napoli*, Italy; and Giuseppe Pezzella, *Centro Italiano Ricerche Aerospaziali*, Italy (**47**, 2, p. 258) Article

A10-029 Plasma Torch Test of an Ultra-High-Temperature Ceramics Nose Cone Demonstrator. Luigi Scatteia, Davide Alfano, and Stefania Cantoni, *Centro Italiano Ricerche Aerospaziali*, Italy; Frederic Monteverde, *National Research Council*, Italy; M. De Stefano Fumo and Andrea Di Maso, *University of Naples "Federico II,"* Italy (**47**, 2, p. 271) Article

A10-030 Operability Benefits of Airbreathing Hypersonic Propulsion for Flexible Access to Space. Kevin W. Flaherty, Katherine M. Andrews, and Glenn W. Liston, *U.S. Air Force Research Laboratory* (**47**, 2, p. 280) Article

A10-031 Effects of Variations in Plasma Propulsion System Performance on Mars Cargo Missions. Kamesh Sankaran, Kellen Oetgen, Marc Rollins, and Evan Staley, *Whitworth University* (**47**, 2, p. 288) Article

A10-032 Formation Optimal Maneuvers Under Inertial Attitude Dynamics. Darren J. Zanon and Mark E. Campbell, *Cornell University* (**47**, 2, p. 295) Article

A10-033 Electrodynamic Tethers Under Forced-Current Variations Part I: Periodic Solutions for Tether Librations. Paul Williams, *Delft University of Technology*, The Netherlands (**47**, 2, p. 308) Article

A10-034 Electrodynamic Tethers Under Forced-Current Variations Part II: Flexible-Tether Estimation and Control. Paul Williams, *Delft University of Technology*, The Netherlands (**47**, 2, p. 320) Article

A10-035 Analysis of Some Global Optimization Algorithms for Space Trajectory Design. Massimiliano Vasile and Edmondo Minisci, *University of Glasgow*, Great Britain; and Marco Locatelli, *Universita' Degli Studi di Torino*, Italy (**47**, 2, p. 334) Article based on AIAA Paper 2008-6277

A10-036 Open-Loop Spinup and Deployment Control of a Tether Sling. Steven G. Tragesser, *University of Colorado*; and Bahman Gorjidooz, *ITT Corporation* (**47**, 2, p. 345) Article based on AIAA Paper 09-245

A10-037 Orbital Propellant Depots Enabling Lunar Architectures Without Heavy-Lift Launch Vehicles. Dale Arney and Alan Wilhite, *Georgia Institute of Technology/National Institute of Aerospace* (**47**, 2, p. 353) Article

A10-038 Optimization of the Mars Ascent Vehicle for Human Space Exploration. Joseph W. Hickman, Alan Wilhite, and Douglas Stanley, *National Institute of Aerospace*; and David R. Komar, *NASA Langley Research Center* (**47**, 2, p. 361) Article

A10-039 Determination of Center-of-Mass of Gravity Recovery and Climate Experiment Satellites. Furun Wang, Srinivas Bettadpur, and Himanshu Save, *University of Texas at Austin*; and Gerhard Kruizinga, *Jet Propulsion Laboratory, California Institute of Technology* (**47**, 2, p. 371) Article

A10-040 Study of Space Microimpacts on Solar Cells and Evaluation of Resultant Degradation. Jianguo Huang, Jianwei Han, Hongwei Li, Minghui Cai, Xiaoyin Li, and Zhuxiu Gao, *Chinese Academy of Sciences*, China (PRC) (**47**, 2, p. 380) Article

A10-041 Smart Divert: A New Mars Robotic Entry, Descent, and Landing Architecture. Michael J. Grant, Bradley A. Steinfeldt, and Robert D. Braun, *Georgia Institute of Technology*; and Gregg H. Barton, *Charles Stark Draper Laboratory* (**47**, 3, p. 385) Article based on AIAA Paper 2009-522

A10-042 Physical and Numerical Aspects of Simulating Rarefied Hypersonic Wedge Flow. Wilson Santos, *National Institute for Space Research*, Brazil (**47**, 3, p. 394) Article

A10-043 Unsteady Supersonic Flows over a Backward-Facing Step with Applied Magnetic Field. Ovais U. Khan and Klaus A. Hoffmann, *Wichita State University* (**47**, 3, p. 405) Article based on AIAA Paper 2007-0396

A10-044 Aerodynamic Modeling of Folded Fin for Unfolding Motion Simulation. Suk Young Jung, *Agency for Defense Development*, South Korea (ROK); and Sung Joon Yoon, *LIG Nex1 Company, Ltd.*, South Korea (ROK) (**47**, 3, p. 413) Article

A10-045 Control Effects of Baffle on Combustion Instability in a LOX/GH_2 Rocket Engine. Songjiang Feng, Wansheng Nie, Bo He, and Fengchen Zhuang, *Academy of Equipment Command and Technology*, China (PRC) (**47**, 3, p. 419) Article

A10-046 Novel Technique for Reconstructing High-Frequency Transient Rocket Chamber-Pressure Measurements. Stephen A. Whitmore, Matthew D. Wilson, and Shannon D. Eilers, *Utah State University* (**47**, 3, p. 427) Article based on AIAA Paper 2009-5288

A10-047 Electrodynamic Tether Applications and Constraints. Juan R. Sanmartin, *Universidad Politecnica de Madrid*, Spain; Enrico C. Lorenzini, *University of Padova*, Italy; and Manuel Martinez-Sanchez, *Massachusetts Institute of Technology* (**47**, 3, p. 442) Article

A10-048 Finite Set Control Transcription for Optimal Control Applications. Stuart A. Stanton and Belinda G. Marchand, *University of Texas at Austin* (**47**, 3, p. 457) Article

A10-049 Technology Requirements of Exploration Beyond Neptune by Solar Sail Propulsion. Malcolm Macdonald, Colin McInnes, and Gareth Hughes, *University of Strathclyde*, Great Britain (**47**, 3, p. 472) Article

A10-050 General Bang–Bang Control Method For Lorentz Augmented Orbits. Brett Streetman, *Draper Laboratory*; and Mason A. Peck, *Cornell University* (**47**, 3, p. 484) Article

A10-051 Dynamic Modeling of a Wind-Driven Tumbleweed Rover Including Atmospheric Effects. Alexandre E. Hartl and Andre P. Mazzoleni, *North Carolina State University* (**47**, 3, p. 493) Article

A10-052 Interim Access to the International Space Station Using Evolved Expendable Launch Vehicles. Stephen A. Whitmore and Tyson K. Smith, *Utah State University* (**47**, 3, p. 503) Article based on AIAA Paper 2009-6807

A10-053 Experimental Charging Behavior of Orion UltraFlex Array Designs. Joel T. Galofaro, Boris V. Vayner, and Grover B. Hillard *NASA John H. Glenn Research Center at Lewis Field* (**47**, 3, p. 521) Article based on AIAA Paper 2009-3525

A10-054 International Round-Robin Tests on Solar Cell Degradation Due to Electrostatic Discharge. Teppei Okumura, *Japan Aerospace Exploration Agency*, Japan; Mengu Cho, *Kyushu Institute of Technology*, Japan; Virginie Inguimbert, *ONERA*, France; Denis Payan, *Centre National d'Etudes Spatiales*, France; Boris Vayner, *Ohio Aerospace Institute*; and Dale C. Ferguson, *U.S. Air Force Research Laboratory* (**47**, 3, p. 533) Article

A10-055 Effectiveness of Aerospike for Drag Reduction on a Blunt Cone in Hypersonic Flow. Vinayak N. Kulkarni, *Indian Institute of Technology Guwahati*, India; Viren I. Menezes, *Indian Institute of Technology Bombay*, India; and K. P. J. Reddy, *Indian Institute of Science*, India (**47**, 3, p. 542) Technical Note

A10-056 Turbulent Supersonic/Hypersonic Heating Correlations for Open and Closed Cavities. Joel L. Everhart and Francis A. Greene, *NASA Langley Research Center* (**47**, 4, p. 545) Article based on AIAA Paper 2009-1400

A10-057 Navier–Stokes Simulations of Hypersonic Flows with Coupled Graphite Ablation. Daniele Bianchi and Francesco Nasuti, *Sapienza University of Rome "La Sapienza,"* Italy; and Emanuele Martelli, *Second University of Naples*, Italy (**47**, 4, p. 554) Article

A10-058 Computational Fluid Dynamics Methods for Hypersonic Flow Around Blunted-Cone-Cylinder-Flare. Shiroshana Tissera and Dimitris Drikakis, *Cranfield University*, Great Britain; and Trevor Birch, *Defense Science and Technology Laboratory*, Great Britain (**47**, 4, p. 563) Article

A10-059 Momentum Exchange Tether as a Hypersonic Parachute During Reentry for Human Missions. Jeffrey A. Kornuta, *Georgia Institute of Technology*; and S. M. Guo, *Louisiana State University* (**47**, 4, p. 571) Article

A10-060 Neutral Density and Crosswind Determination from Arbitrarily Oriented Multiaxis Accelerometers on Satellites. Eelco Doornbos and Jose van den IJssel, *Delft University of Technology*, The Netherlands; Hermann Luehr and Matthias Foerster, *Helmholtz Centre Potsdam, GFZ–German Centre for Geosciences*, Germany; and Georg Koppenwallner, *Hypersonic Technology Goettingen*, Germany (**47**, 4, p. 580) Article

A10-061 Aerocapture Ballutes Versus Aerocapture Tethers for Exploration of the Solar System. Kristin L. Gates and James M. Longuski, *Purdue University* (**47**, 4, p. 590) Article

A10-062 Optimal Periodic Cruise Trajectories via a Two-Level Optimization Method. Bing-Nan Kang, *Northwestern Polytechnical University*, China (PRC); David B. Spencer, *Pennsylvania State University*; Shuo Tang, *Northwestern Polytechnical University*, China (PRC); and Dan Jordan, *Pennsylvania State University* (**47**, 4, p. 597) Article based on AIAA Paper 2009-6285

A10-063 Formation Control at the Sun–Earth L_2 Libration Point Using Solar Radiation Pressure. Kamran Shahid and K. D. Kumar, *Ryerson University*, Canada (**47**, 4, p. 614) Article

A10-064 Experimental Investigation on Microwave Interference in Full-Scale Solid Rocket Exhaust. Kiyoshi Kinefuchi, *University of Tokyo*, Japan; Ikkoh Funaki, Toru Shimada, and Takashi Abe, *Japan Aerospace Exploration Agency*, Japan (**47**, 4, p. 627) Article

A10-065 Importance of Surface Conditions for Spacecraft Charging. Shu T. Lai, *U.S. Air Force Research Laboratory* (**47**, 4, p. 634) Article based on AIAA Paper 2009-349

A10-066 Computational Procedure for the Life Assessment of Solid Rocket Motors. Sebnem Özüpek, *Bogaziçi University*, Turkey (**47**, 4, p. 639) Article

A10-067 Dynamics of Gas Evacuation from a Honeycomb Structure Having Common Wall Perforations. Chun P. Lee, *Combustion Research and Flow Technology, Inc.*; Amrutur V. Anilkumar, *Vanderbilt University*; and Richard N. Grugel, *NASA Marshall Space Flight Center* (**47**, 4, p. 649) Article

A10-068 Design and Flight Qualification of the Rigidizable Inflatable Get-Away-Special Experiment. Richard G. Cobb, Jonathan T. Black, and Eric D. Swenson, *Air Force Institute of Technology* (**47**, 4, p. 659) Article based on AIAA Paper 2009-2155

A10-069 Dynamic Fluid Interface Experiments Aboard the International Space Station: Model Benchmarking Dataset. Ryan M. Jenson and Mark M. Weislogel, *Portland State University*; Jorg Klatte and Michael E. Dreyer, *University of Bremen*, Germany (**47**, 4, p. 670) Article based on AIAA Paper 2008-0816

A10-070 Miniaturized Optic Sensor for Leak Detection in a Space Environment. John E. Sinko, Valentin Korman, and Adam Hendrickson, *Kratos Defense and Security Solutions*; and Kurt A. Polzin, *NASA Marshall Space Flight Center* (**47**, 4, p. 680) Article based on AIAA Paper 2009-5394

A10-071 Optimal Reentry Time Estimation of an Upper Stage from Geostationary Transfer Orbit. M. Mutyalarao and Ram K. Sharma, *Vikram Sarabhai Space Centre*, India (**47**, 4, p. 686) Technical Note

A10-072 Mars Surface Exploration Caching from an Orbiting Logistics Depot. Jaemyung Ahn and Olivier L. de Weck, *Massachusetts Institute of Technology* (**47**, 4, p. 690) Technical Note

A10-073 Shape Optimization for Hypersonic Arc-Wing Missiles. Kai Cui and Guo-Wei Yang, *Chinese Academy of Sciences*, China (PRC) (**47**, 4, p. 694) Technical Note

A10-074 Effect of an Altitude-Dependent Background Atmosphere on Shuttle Plumes. Carolyn R. Kaplan and Paul A. Bernhardt, *U.S. Naval Research Laboratory* (**47**, 4, p. 700) Technical Note

A10-075 Introduction: Atmospheric Entry of the Stardust Sample Return Capsule. Dean A. Kontinos and Michael J. Wright, *NASA Ames Research Center* (**47**, 5, p. 705) Article

A10-076 Modeling of Stardust Entry at High Altitude, Part 1: Flowfield Analysis. Iain D. Boyd, *University of Michigan*; Kerry A. Trumble, *ELORET Institute*; and Michael J. Wright, *NASA Ames Research Center* (**47**, 5, p. 708) Article based on AIAA Paper 2007-4543

A10-077 Observations of the Stardust Sample Return Capsule Entry with a Slitless Echelle Spectrograph. Peter Jenniskens, *SETI Institute* (**47**, 5, p. 718) Article based on AIAA Paper 2008-1210

A10-078 Stardust Entry Reconstruction. Prasun N. Desai and Garry D. Qualls, *NASA Langley Research Center* (**47**, 5, p. 736) Article based on AIAA Paper 2008-1198

A10-079 Radiation Modeling For the Reentry of the Stardust Sample Return Capsule. Yen Liu, *NASA Ames Research Center*; Dinesh Prabhu, *ELORET Corporation*; Kerry A. Trumble, *NASA Ames Research Center*; David Saunders, *ELORET Corporation*; and Peter Jenniskens, *SETI Institute* (**47**, 5, p. 741) Article based on AIAA Paper 2008-1213

A10-080 Near-Ultraviolet Spectroscopy of the Stardust Sample Return Capsule Reentry. Richard L. Rairden, *Lockheed Martin Advanced Technologies Center*; and Peter Jenniskens, *SETI Institute* (**47**, 5, p. 753) Article

A10-081 Modeling of Sodium Radiation from Reentry Flows at High Altitudes. Jiaqiang Zhong and Deborah A. Levin, *Pennsylvania State University* (**47**, 5, p. 757) Article

A10-082 Postflight Aerothermal Analysis of the Stardust Sample Return Capsule. Kerry A. Trumble, *NASA Ames Research Center*; Ioana Cozmuta and Steve Sepka, *ELORET Corporation*; Peter Jenniskens, *SETI Institute*; and Michael Winter, *NASA Ames Research Center* (**47**, 5, p. 765) Article based on AIAA Paper 2008-1201

A10-083 Loosely Coupled Simulation for Two-Dimensional Ablation and Shape Change. Yih-Kanq Chen and Frank S. Milos, *NASA Ames Research Center*; and Tahir Gokcen, *ELORET Corporation* (**47**, 5, p. 775) Article based on AIAA Paper 2008-3802

A10-084 Ablation and Thermal Response Property Model Validation for Phenolic Impregnated Carbon Ablator. Frank S. Milos and Yih-Kanq Chen, *NASA Ames Research Center* (**47**, 5, p. 786) Article based on AIAA Paper 2009-262

A10-085 Simulating Nonequilibrium Flow for Ablative Earth Reentry. J. S. Shang, *Wright State University*; and S. T. Surzhikov, *Russian Academy of Sciences*, Russia (**47**, 5, p. 806) Article based on AIAA Paper 2010-983

A10-086 Numerical Study of Magnetoaerodynamic Flow Around a Hemisphere. Nicholas J. Bisek and Iain D. Boyd, *University of Michigan*; and Jonathan Poggie, *U.S. Air Force Research Laboratory* (**47**, 5, p. 816) Article based on AIAA Paper 2010-227

A10-087 Transition Experiments on Blunt Bodies with Isolated Roughness Elements in Hypersonic Flight. D. C. Reda and M. C. Wilder, *NASA Ames Research Center*; and D. K. Prabhu, *ELORET Corporation* (**47**, 5, p. 828) Article based on AIAA Paper 2010-1367

A10-088 Performance Characterization of Supersonic Retropropulsion for High-Mass Mars Entry Systems. Ashley M. Korzun and Robert D. Braun, *Georgia Institute of Technology* (**47**, 5, p. 836) Article based on AIAA Paper 2009-5613

A10-089 Dynamic Characteristics of a Bellows-Type Mixture-Ratio Stabilizer for a Liquid Rocket Engine. Taekyu Jung and Sooyong Lee, *Korea Aerospace Research Institute*, South Korea (ROK); and Sejin Kwon, *Korea Advanced Institute of Science and Technology*, South Korea (ROK) (**47**, 5, p. 849) Article

A10-090 Chandrayaan-1 Real-Time Orbit Determination. N. V. Vighnesam, Anatta Sonney, and Boominathan Subramanian, *ISRO Satellite Center*, India (**47**, 5, p. 857) Technical Note

A10-091 Experimental and Numerical Simulation Study of Liquid-Propellant Draining from Rocket Tanks. Kiyoshi Kinefuchi, Toru Kamita, and Hideyo Negishi, *Japan Aerospace Exploration Agency*, Japan; Keisuke Yamada and Masanobu Fujimura, *IHI Aerospace Company, Ltd.*, Japan (**47**, 5, p. 860) Technical Note

A10-092 Imaging and Slitless Spectroscopy of the Stardust Capsule Reentry Radiation. Franziska Harms, *Kayser-Threde, GmbH*, Germany; Juergen Wolf, *University of Stuttgart*, Germany; George Raiche, *NASA Ames Research Center*; and Peter Jenniskens, *SETI Institute* (**47**, 6, p. 868) Article based on AIAA Paper 2008-1214

A10-093 Resolved CN Band Profile of Stardust Capsule Radiation at Peak Heating. Peter Jenniskens, *SETI Institute*; Michael A. Wilson, *University of California, San Francisco*; Michael Winter and Christophe O. Laux, *École Centrale Paris*, France (**47**, 6, p. 873) Article

A10-094 Near-Infrared Spectroscopy of Stardust Sample Return Capsule Entry: Detection of Carbon. Michael J. Taylor, *Utah State University*; and Peter Jenniskens, *SETI Institute* (**47**, 6, p. 878) Article

A10-095 High-Speed Spectrographic Photometry of the Stardust Sample Return Capsule Around Peak Deceleration. Hans C. Stenbaek-Nielsen, *University of Alaska*; and Peter Jenniskens, *SETI Institute* (**47**, 6, p. 884) Article

A10-096 Digital Still Snapshots of the Stardust Sample Return Capsule Entry. Paul F. Wercinski, NASA Ames Research Center; and Peter Jenniskens, SETI Institute (**47**, 6, p. 889) Article

A10-097 Intensified Low-Resolution Optical Spectroscopy of the Stardust Sample Return Capsule Entry. Peter Jenniskens, *SETI Institute*; Mike Koop and Jim Albers, *Lockheed Martin Corporation* (**47**, 6, p. 895) Article

A10-098 Modeling of Stardust Entry at High Altitude, Part 2: Radiation Analysis. Iain D. Boyd, *University of Michigan*; and Peter M. Jenniskens, *SETI Institute* (**47**, 6, p. 901) Article based on AIAA Paper 2008-1218

A10-099 Multiscale Approach to Ablation Modeling of Phenolic Impregnated Carbon Ablators. Jean Lachaud, *NASA Ames Research Center*; Ioana Cozmuta, *ELORET Corporation*; and Nagi N. Mansour, *NASA Ames Research Center* (**47**, 6, p. 910) Article

A10-100 Boundary-Layer Transition on X-43A. Scott Berry, Kamran Daryabeigi, and Kathryn Wurster, *NASA Langley Research Center*; and Robert Bittner, *ATK Space Division* (**47**, 6, p. 922) Article based on AIAA Paper 2008-3736

A10-101 Parametric Study of Peripheral Nozzle Configurations for Supersonic Retropropulsion. Noel M. Bakhtian, *Stanford University*; and Michael J. Aftosmis, *NASA Ames Research Center* (**47**, 6, p. 935) Article based on AIAA Paper 2010-1239

A10-102 Semiempirical Model for Satellite Energy-Accommodation Coefficients. Marcin D. Pilinski, Brian M. Argrow, and Scott E. Palo, *University of Colorado* (**47**, 6, p. 951) Article

A10-103 Hot-Gas Side Jet in a Supersonic Freestream. Bernhard Stahl, Frank Siebe, and Ali Gülhan, *DLR, German Aerospace Center*, Germany (**47**, 6, p. 957) Article

A10-104 Characterization Experiments of Secondary Arcs on Solar Arrays: Threshold and Duration. Hirokazu Masui, Takayuki Ose, Tomoki Kitamura, Kazuhiro Toyoda, and Mengu Cho, *Kyushu Institute of Technology*, Japan (**47**, 6, p. 966) Article

A10-105 Magnus and Spin-Damping Measurements of a Spinning Projectile Using Design of Experiments. Se-Yoon Oh, Sung-Cheol Kim, Do-Kwan Lee, Sangho Kim, and Seung-Ki Ahn, *Agency for Defense Development*, South Korea (ROK) (**47**, 6, p. 974) Article based on AIAA Paper 2009-5844

A10-106 Design and Feasibility of ExoMars Supersonic Parachute Scirocco Test. R. Votta, M. Marini, F. De Filippis, M. Di Vice, and R. Sabatano, *Centro Italiano Ricerche Aerospaziali*, Italy (**47**, 6, p. 981) Article based on AIAA Paper 2009-7235

A10-107 Asteroid Destinations Accessible for Human Exploration: A Preliminary Survey in Mid-2009. Daniel R. Adamo and Jon D. Giorgini, *Jet Propulsion Laboratory, California Institute of Technology*; Paul A. Abell and Rob R. Landis, *NASA Johnson Space Center* (**47**, 6, p. 994) Article

A10-108 Trajectory Reconstruction of a Sounding Rocket Using Intertial Measurement Unit and Landmark Data. Ryan S. Park, Shyam Bhaskaran, Yang Cheng, Andrew J. Johnson, Michael E. Lisano, and Aron A. Wolf, *Jet Propulsion Laboratory, California Institute of Technology* (**47**, 6, p. 1003) Article

A10-109 Predictive Nutation and Spin Inversion Control of Spin-Stabilized Spacecraft. Hyun-Sam Myung and Hyochoong Bang, *Korea Advanced Institute of Science and Technology*, South Korea (ROK) (**47**, 6, p. 1010) Article

A10-110 Biased Star Tracker Measurements of Forty-Nine Stars from Flight Data. Noah H. Smith, Sungkoo Bae and Bob Schutz, *University of Texas at Austin* (**47**, 6, p. 1023) Article

A10-111 Robust Optimization of Thermal-Dynamic Coupling Systems Using a Kriging Model. Lijia Fan, Zhihai Xiang, Mingde Xue, and Zhangzhi Cen, *Tsinghua University*, China (PRC) (**47**, 6, p. 1029) Article

A10-112 Modeling and Experimental Validation of Space Structures with Wiring Harnesses. Vit Babuska, *Sandia National Laboratories*; Douglas M. Coombs and James C. Goodding, *CSA Engineering*; Emil V. Ardelean, *Schafer Corporation*; Lawrence M. Robertson and Steven A. Lane, *U.S. Air Force Research Laboratory* (**47**, 6, p. 1038) Article

A10-113 Deployable Trusses Based on Large Rotation Flexure Hinges. Juan M. Mejia-Ariza, *L'Garde, Inc.*; Thomas W. Murphey and Hans-Peter Dumm, *U.S. Air Force Research Laboratory* (**47**, 6, p. 1053) Article

A10-114 Optimum Design of a Space Frame and its Application in Satellite Structure. Shenyan Chen and Hai Huang, *Beihang University*, China (PRC) (**47**, 6, p. 1063) Technical Note

A10-115 Microgravity Demonstrations of Flux Pinning for Station-Keeping and Reconfiguration of CubeSat-Sized Spacecraft. Joseph Shoer, William Wilson, Laura Jones, Max Knobel, and Mason Peck, *Cornell University* (**47**, 6, p. 1066) Technical Note

A10-116 Designing for the Space Environment via Trade Space Exploration. Christopher Binz, David B. Spencer, Deborah A. Levin, and Timothy W. Simpson, *Pennsylvania State University* (**47**, 6, p. 1070) Technical Note
